

Project Roadmap: Token-Catalyst

General Objectives

Establish a technical, legal, and product foundation for launching a token backed by the energy potential of catalysts.

Development Stages

Stage	Timeline	Objectives
Research & Planning	Month 1	Complete architecture and legal framework
MVP + Smart Contract	Month 2–3	Deploy testnet, basic interface, object registry
Pilot Installation	Month 4	Verify production capacity
Test Token Issuance	Month 5	Mint tokens with limited liquidity
DAO Formation	Month 6	Launch governance and participation
Market Expansion	Month 7+	Scale catalysts and marketing
